rapid sequence vs time lapse, P36
Tc-99m IDA cholescintigraphy (Atlas article), 231
Tc-99m PIPIDA and ultrasound in common bile duct obstruction, P36

Hyperthyroidism

angiographic findings, 10
after radiation therapy for Hodgkin's disease, 69

I

Indium-111 DTPA

gastric emptying in mixed solid-liquid meal, 213

Indium-111 leukocyte imaging

clinical utility and accuracy, P44
Dacron graft, In-111 WBC
eosinophile, P65

evaluation of, P44
inflammatory bowel disease, 469
labeling method, P31, P64
variation in patterns, P45

Instrumentation

collimator performance in SPECT, P73
computer as multichannel analyzer, P67
digital teaching files, P68
increasing camera count rate capability, P67
making your image processing computer work full time, P68
what to tell programmer, P68

Inflammatory lesion imaging

bone imaging in bone and joint infection, photopenia, 13
bowel, with Ga-67, 382
brain abscess, with Tc-99m glucoheptonate, 166
capsular contractures around breast implant, 572
clinical utility and accuracy with In-111 WBC, P44
dacron graft and In-111 WBC, P39
evaluation of In-111 WBC imaging, P44
Ga-67 in osteomyelitis, P44
Ga-67 in pneumocystis carinii pneumonia, 71
inflammatory bowel disease with In-111 leukocytes, 469
psoas muscle inflammation with Ga-67, 426
pyogenic sacroiliitis, 295
soft tissue abscess, with Ga-67, 325
variation in In-111 WBC patterns, P45

Iodine-123 iodoamphetamine

SPECT and Tc-99m glucoheptonate in cerebral infarction, 385

Iodine-123 sodium iodide

incidence of pyramidal lobe on thyroid imaging, 560

Iodine-125 iothalamate

GFR, comparison with Tc-99m DTPA, 359

Iodine-131 hippuran

kidney transplantation complications, P70

Iodine-131 rose bengal

nuclear medicine imaging compared with ultrasound for cystic duct patency, 117

Iodine-131 sodium iodide

uptake in bronchogenic carcinoma, 368

K

Kidney

differential function with Tc-99m glucoheptonate, P69
GFR, comparison of Tc-99m DTPA and I-125 iothalamate, 359
GFR with Tc-99m DTPA, P31
imaging after partial renal irradiation (Tc-99m MDP), 113
imaging in conjoined twins, with Tc-99m DTPA, 477
imaging with Tc-99m MDP, in myoglobinuria, 476
intraparenchymal perirenal pseudocyst following trauma, 472
ovarian vein on renal imaging, 523
papillary necrosis, 294
pediatric studies, P38
pitfalls in diagnosis of mass lesion with Tc-99m DMSA, 327
prediction of recovery with obstruction with Tc-99m DMSA, P38
transplantation, complications, P70
uptake of Tc-99m MDP with amphotericin B therapy, 293
urinoma, 540

Krypton-81m

- lung ventilation imaging, 122, 142
- regional pulmonary function, 132

L

Left ventricular ejection fraction

- after aortic valve replacement, P35
- asynergy in exercise, P34
- first pass, P63
- Fourier analysis in LV dysfunction, P34
- immediate and maximal with Au-195 first pass, P47
- localization of coronary artery disease, P35
- mitral valve prolapse, 562
- radial ejection fraction, P46
- using seven-pin-hole collimator, 151

Left ventricular wall motion studies

- asynergy in exercise, P34
- computer edge displays, 454
- first pass, 63
- Fourier analysis in dysfunction, P31
- localization of coronary artery disease, P35
- mitral valve prolapse, 562
- modified anterior projection for inferior and apical abnormalities, 161
- radial ejection fraction, P46
- severity of coronary artery disease, P33
- Uhl's anomaly, 525
- using seven-pin-hole collimator, 151

Letters to the Editor

- focal uptake of Tc-99m sulfur colloid in atelectasis, 244
- Ga-67 localization, 242
- scintigraphic arthrography, 90, 243

Liver imaging

- acute hepatitis, compared with hepatobiliary imaging, 315
- complementary role with hepatobiliary imaging, 64
- decreased Tc-99m sulfur colloid uptake in spleen in carcinoma of pancreas, 1
- false-positive abnormality, changed with position, 171
- focal nodular hyperplasia, Tc-99m phytate and IDA, 423

- measuring changes in pulmonary blood flow, P40
- regional pulmonary function, 132
- ventilation-perfusion mismatch in tumor embolism, 320
- ventricular septal defect, 323
- Tc-99m HSA in adult respiratory distress syndrome, P72

Lung ventilation imaging

- gastroesophageal reflux in nocturnal asthma, 318
- influence on patient management, P73
- inhalation imaging with Tc-99m sulfur colloid in pulmonary embolism (Atlas article), 340

inhalation with Tc-99m DTPA, 180, P40

Kr-81m, 122, 142

post-perfusion Xe-133 scan, P41

regional pulmonary function, 132

ventilation-perfusion mismatch in tumor embolism, 320

Lymphoscintigraphy

- ocular subconjunctival in chemosis, 277
- pediatric radionuclide lymphography (Atlas article), 428

M

Meckel's diverticulum imaging

- editorial, 482
- "false-negative" scan, 441
- false-positive with uterine blush, 444

Myocardial imaging

- asynergy in exercise, P34
- breast artifacts with Tl-201 and Tc-99m PYP, 53
- comments on quantitative test evaluation (editorial), 300
- diffuse uptake with Tc-99m PYP, 63
- doughnut pattern with Tc-99m pyrophosphate, 447
- early and delayed with Tc-99m PYP, P63
- improved computerized quantitation with Tl-201, 253
- modified LAO with Tl-201, P48
- necrosis, Tc-99m PYP and Tl-201, P32
- normal limits with Tl-201, P48
- pulmonary activity with Tl-201, P63
- rapid resolution of defects with stress Tl-201 imaging, 458
- severity of stress defect on accuracy of Tl-201, P49
- slow washout of Tl-201, P32
- steep LAO with Tl-201, P48
- stress Tl-201 with and without myocardial infarction, P32
- Tc-99m PYP in CABG patients, P32
- Tl-201 in longer exercise, positive stress EKG, P33
- Tl-201 in submaximal exercise and quantitation, P37
- Uhl's anomaly with Tl-201, 525
- using Au-195m, P41

N

Nuclear cardiology

- aortic regurgitation, rest and exercise, P35
- after aortic valve replacement, P35
- breast artifacts, 53
- computer edge displays for wall motion evaluation, 454
- diastolic dysfunction in hypertension, P31
- diastolic filling as predictor of coronary artery disease, P34
- doughnut pattern with Tc-99m pyrophosphate, 447
- early and delayed with Tc-99m PYP, P63
- edge detection, phantom studies, 46
- first pass imaging, P34, P63
- first pass with Au-195, P47
- Fourier analysis with severe left ventricular dysfunction, 34
- gated studies with multivariate analysis, P47
- improved computerized quantitation with Tl-201, 253
- leaking Glenn anastomosis, 58
- left ventricular ejection fraction and wall motion with 7-pin-hole collimator, 151
- left ventricular wall motion and severity of coronary artery disease, P33
- localization of coronary artery disease with gated imaging, P35
- mitral valve prolapse, 562

- modified anterior projection for inferior wall and apical abnormalities, 161
 modified LAO with Tl-201, P48
 myocardial asynergy in exercise, P34
 myocardial necrosis with Tc-99m PYP and Tl-201, P32
 normal limits with Tl-201, P48
 phase imaging, P35, P47
 positioning and quantitation with Tl-201, P48
 pulmonary activity with Tl-201, P63
 quantitation with Tl-201, P49
 radial ejection fraction, P36
 rapid resolution of defects with stress Tl-201 imaging, 458
 severity of stress defect on accuracy of Tl-201, P49
 slow washout of Tl-201, P32
 steep LAO with Tl-201, P48
 stress Tl-201 with and without MI, P32
 Tc-99m PYP in CABG patients, P32
 thallium-201 imaging with 7-pinhole collimator, 151
 Tl-201 in longer exercise, positive exercise EKG, P33
 Tl-201 in submaximal exercise and quantitation, P33
 Uhl's anomaly, 525
 using 7-pinhole collimator, 193
 ventricular volume, changes due to spleen, blood radioactivity, P64
- Nuclear magnetic resonance**
 processing images, P72
 system choice, P73
- P**
- Phase imaging**
 limitation of first harmonic, P35
 non-cyclic dynamic studies, P46
 valve planes, P47
- Photopenia in bone imaging**
 conversion of "hot" spot to "cold" lesion, 190
 due to gastric contents, 479
 in bone and joint infection, 13
 in neuroblastoma, 21

- thymoma, 149

Technetium-99m sulfur colloid

- acute hepatitis, compared with Tc-99m sulfur colloid, 315
- complementary role with Tc-99m HIDA in liver imaging, 64
- decreased splenic uptake in carcinoma of pancreas, 1
- extramedullary hematopoiesis, 86
- false positive GI bleeding study due to accessory spleen, 38
- false positive liver, changed with position, 171
- focal marrow replacement, 409
- functional asplenia in hemoglobin SE disease, 100
- gallbladder displacement in cirrhosis simulating ectopia, 284
- gastric emptying in mixed solid-liquid meal, 215
- gastroesophageal reflux in nocturnal asthma, 318

- GI bleeding in colonic interposition, 225
hepatic "boomerang" appearance after radiation for carcinoma of pancreas, 299
in splenic metastasis from colon carcinoma, 5
intra arterial, chemotherapy, P72
leiomyosarcoma of stomach on blood flow imaging, 227
lymphoscintigraphy, ocular subconjunctival, 277
multiple splenic infarcts in Menetrier's disease, 526
pediatric lymphography (Atlas article), 428
perisplenic halo due to ascites, 187
regression of splenic lesions, 311
scintigraphy arthrography, 516
situs inversus and asplenia, 543
splenic defects in cystic lymphangiomas, 416
splenic trauma, 267
splenomegaly, and as seen on gated imaging, 568
splenosis, 67
Tc-99m labeled chicken liver in gastric emptying, P36
umbilical vein on blood flow study in cirrhosis, 280
- Thallium-201**
asynergy in exercise, P34
breast artifact with myocardial imaging, 53
comments on quantitative test evaluation (editorial), 300
improved computerized quantitation, 253
limb scan abnormality due to unilateral tremor, 570
longer exercise, positive stress EKG, P33
long-term retention of Tl-201, P74
modified LAO, P48
myocardial necrosis compared with Tc-99m PYP, P32
normal limits, P48
positioning and quantitation, P48
pulmonary activity, P63
quantitation, P49
rapid resolution of defects with stress imaging, 458
severity of stress defect on accuracy, P49
slow washout, importance of, P32
steep LAO with Tl-201, P48
stress imaging with and without MI, P32
submaximal exercise and quantitation, P33
Uhl's anomaly, 525
using 7-pinhole collimator, 157
- Therapy**
P-32 microspheres in hepatic neoplasm, P42
uptake after I-131 for Graves' disease, P65
- Thymoma imaging**
Tc-99m glucoheptonate, 577
Tc-99m sodium pertechnetate, 149
- Thymus gland**
Ga-67 uptake after therapy for septicemia, 407
- Thyroid gland**
free T4, P66
radiation and risk of thyroid cancer, 272
serum thyroglobulin after I-131 treatment for carcinoma, P37
T4 to T3 conversion by LATS, P38
ultrasound, P66
uptake after I-131 for Graves', P65
- Thyroid imaging**
accumulation of bone imaging agents in medullary carcinoma, 297
compared with ultrasound in suppressed thyroid tissue, 8
I-131 and carcinoma, noncorrelation with thyroglobulin, P37
incidence of pyramidal lobe, 560
Tc-99m diphosphonate in differential diagnosis of thyroid nodules, 353
uptake of I-131 in bronchogenic carcinoma, 368
- Tumor imaging (other than those specified)**
CEA antigen kinetics, P41
CT, P66
effects of circulating antigen on antibody localization, P41
human tumor xenograft with monoclonal antibodies, P42
I-131 metaiodo benzylguanidine in neuroectodermal neoplasia, P38
intravascular tumor volumes, P42
targeting unilamellar vesicles to murine tumors, P42
ultrasound, P66
- U**
- Ultrasound**
comparison with nuclear medicine imaging in cystic duct patency, 117
comparison with Tc-99m IDA in acute cholecystitis, 359
with thyroid imaging in suppressed thyroid, 8
thyroid, P66
